Front-End Developer

About me

Looking for a promising company with interesting projects.

Front-end developer with 1+ year of commercial experience in developing and improving CRM/ERP system.

Eager to grow in React / Angular.

Work experience

Front-End Developer · Primo Tech Solutions

March 2024 - Present · 12 months

- Led a complete redesign of the user interface, enhancing usability and mobile adaptation.

- Migrated modal windows to AJAX requests, improving dynamic interactions without page reloads.

- Refactored HTML code, following designer mockups and semantic markup principles.

- Conducted a full CSS refactoring, implementing reusable UI components.

- Created new pages and elements within the system based on the MVC pattern.

- Worked with Git: created and closed issues, maintained version history.

- Wrote SQL queries to interact with the database.

- Developed two multi-page websites from scratch, including adaptive layout and styling.

Skills: PHP (Programming Language), JQuery, Cascading Style Sheets (CSS), HTML, JavaScript (Programming Language), CodeIgniter, Git, Bootstrap
